Press Release

Ampvolts Limited Partners with Mecpower Solutions Limited to Develop Green Power Infrastructure for EV charging

Vadodara, May 8, 2025: Ampvolts Limited, one of India's leading electric vehicle charging infrastructure provider, has signed a Memorandum of Understanding (MoU) with Mecpower Solutions Limited, part of Onix Group of companies, a prominent Solar Power provider. This strategic collaboration aims to advance green mobility solutions by leveraging the synergies of both organizations to develop sustainable & robust EV charging infrastructure in India.

As part of the agreement, Ampvolts will identify strategic locations for bulk EV charging stations and serve as the front-end partner for key projects. The company will also ensure the provision of necessary resources, like support, and the development of sustainable green mobility solutions.

Mecpower Solutions Limited will compliment by supplying the latest solar power plants and machinery, including PV panels, inverters, and associated hardware, to Ampvolts Limited. The company will also extend its experience and expertise to provide the most optimized solar power plants in line with respective DISCOMs rules and schemes, delivering innovative and comprehensive solutions to enhance business operations.

Speaking on this association, **Mr. Naimish Raval - Director, Ampvolts Limited**, said, *"This partnership is paving the path for speeding the EV adoption and green mobility mission of our nation, and to create a sustainable EV ecosystem. Mecpower's expertise in providing green infrastructure will enhance our capabilities to offer our customers reliable and efficient charging solutions and will provide long-lasting green mobility. Together with Mecpower, we are seeing an acceleration in the transition to green mobility by delivering integrated solutions that empower corporates and the logistics industry to mitigate carbon emission and get them closer to the Net-Zero stage."*

Echoing similar sentiments, **Mr. Setul Shah, Director of Mecpower Solutions Limited**, *"We are pleased to announce our strategic collaboration with **Ampvolts**, marking a transformative step toward advancing green mobility in India. Ampvolts' strong reach across electric cars, e-buses, and e-trucks, combined with their deep understanding of mobility needs, perfectly complements Mecpower's expertise in clean energy. Through this partnership, **Mecpower will power EV charging infrastructure using solar energy**, while delivering tailored charging equipment and software solutions that align with evolving industry demands and sustainability goals. Together, we aim to drive meaningful impact in the shift toward a cleaner, smarter future."*

This strategic partnership highlights a shared commitment to building a sustainable future, fostering innovation, and meeting the growing demand for eco-friendly mobility solutions.

About ampvolts Limited

Ampvolts is a leading Charge Point Operator (CPO), EV charging hub & green mobility solution provider, bringing an entire range of ARAI-certified AC & DC chargers. With a strategic B2B green mobility focus, ampvolts is powering the electric revolution with innovative and sustainable EV charging solutions designed to meet domestic & overseas requirements. With a commitment to excellence and a passion for progress, reshaping the future of transportation and paving the path for **"true green"** mobility. Ampvolts is solving operators/users/service providers' operational challenges for a smooth transition towards green mobility, be it electric cars, e-buses, or even up to 55 tons e-trucks with enabling infrastructure for green corridors, which ultimately adds to cleaner and greener plants.

About Mecpower Solutions Limited

Mecpower Solutions Ltd. is a leading solar EPC company committed to delivering reliable, high-performance solar energy solutions across India. With years of experience and a strong focus on quality, innovation, and sustainability, we design and execute customized solar projects for commercial, industrial, and institutional clients. From rooftops to ground-mounted systems, we help businesses reduce energy costs and transition toward a greener future—powered by the sun.
