Press Release

ampvolts Limited grabs prestigious order from GHCL Limited

Vadodara, August 29, 2025: ampvolts Limited, one of India's leading ev infrastructure and green mobility solution provider, has been awarded long term contract from M/s. GHCL Limited, to for transportation of imported commodities from Pipavav port to their Sutrapada factory. Under this contract ampvolts will deploy 10 electric trucks of 55 tones and operate it through one of the GHCL's empaneled Local Service Provider (LSP). This deal will further ensures ampvolts charging station's Minimum Usage Guarantee (MUG) and also will bring decent turnover backed with healthy EBITDA.

Speaking at this occasion, Mr. **Vipul Chauhan – Managing Director, ampvolts Limited**, said, " We admire the visionary leadership under GHCL's Mr P. N. Rao, Vice President - Commercial, GHCL Limited, who has been instrumental in pioneering the green freight corridor in Gujarat. This contract will give us platform to demonstrate complete green corridor with Zero Emission Trucking (ZET) and reduce carbon footprint towards ESG compliance. Our expertise in developing customized charging infrastructure solutions will be vital support for this green freight corridor. We have identified strong local partners and also geared up to accommodate current and future traffic of increasing numbers of electric trucks on the same route, with our scalable charging Solution. We aim to provide reliable long term sustainable ecosystem in the green mobility to corporate clients like GHCL."

About ampvolts Limited

ampvolts is a leading EV charging hub & green mobility solution provider, bringing entire range of ARAI certified AC & DC chargers. With a strategic B2B green mobility focus, ampvolts is powering the electric revolution with innovative and sustainable EV charging solutions designed to meet domestic & overseas requirements. With a commitment to excellence and a passion for progress, reshaping the future of transportation and paving the path for "true green" mobility. ampvolts is solving operators/users/service providers' operational challenges for a smooth transition towards green mobility, be it electric cars, e-buses, or even up to e-trucks with enabling infrastructure for green corridors, which ultimately adds to cleaner and greener plants.
